Bluetooth Pairing Standalone HMD (Quest 1, Quest 2, Quest Pro, Quest 3, Pico 3, Pico 4)

1. Before pairing for the first time, make sure your VR headset is fully charged.

2. Power on your haptic device, then use the headset to pair with Bluetooth like any other device. At some point in the pairing sequence you will see a confirmation code pop up. You can ignore (confirm) this since your haptic device does not have a screen from which to show the code. Proceed and then you are done. Your device will not show in actively connected devices. This is normal behavior.

3. To confirm whether or not it is successfully paired, launch a compatible game and enable haptics in game settings as required. Your haptic device will automatically pair with a distinct rumble, and the blinking white or green LED will turn solid as it rumbles. If it paired you are good to go! Skip to troubleshooting below if you encounter issues.
