

# Basic troubleshooting & tips

1. If the Starter feels wobbly or 'loose', tighten the various joints using the larger of the 2 allen keys provided.
2. You can save yourself some effort when changing setup for different games by taking pictures of what works in a particular game before changing it, to make it easier to go back to later on.
3. If you are trying to figure out how to use your sling, there are countless video guides on YouTube for airsoft, and actual firearms that translate perfectly to Starter use.
4. Much more information is provided in the links shared at the very start of this guide. I did not cover any of that information here.
